

Dear Sir and Madam,

The proposal of using BPL or PLC is disturbing to me and I object. This technology will interfere with the existing HF radio spectrum and the frequency allocations used in over-the-air communications.

This type of intrusion into the HF spectrum must not be allowed to be implemented. The RF pollution from BPL or PLC is not welcome.

In brief, on a moral level conceptually, one User's interests should not be put above another's, and in this case, power company's interests over current inhabitants of the HF spectrum as it is now. On a legal level, causing of harmful interfere intentionally or unintentionally in the RF spectrum is against the law as I understand it. Please feel free to contact met regarding this matter.

Sincerely,
F. Fuentes III
